

I am writing to oppose HB5429.

This would make Darien uninhabitable from a density population. Darien currently has 7,278 houses/apartments. This would allow for an additional 10,000 new houses/apartments in Darien and an additional 25,000 people.

Our schools are already at full capacity. Our Hindley school has had to have temporary building put in when we have large grade levels, and this is based on the current town population.

Have you tried to go past DHS or Middlesex schools at a drop off or pick up time in the current state of our population?

Darien, I-95, and the Merritt are already to congested with traffic. We already have flooding and water issues all over town. This would create incredible amounts of traffic and we would have flooding increases that are not manageable.

Have you witnessed the flooding in Noroton Heights? Have you seen the flooding of Darien train station?

I am strongly opposed to HB5429
